WHY PTS?

"We used to spend thousands of dollars for appealing our assessment; often after a lengthy process we saw very little results. With PTS Inc. in charge of our income submission assessed value has stabilized and there is no need for appeal. In addition we don't worry about the next year."

... N.S.
Commerce City

With over 15 years in the assessment and taxation business, we are thoroughly familiar with all formulas and methods used in determining your next assessment, and we employ every available allowance to your advantage.

Only information pertaining to assessment of your property will be provided to MPAC.

Your next assessment will be based on the income you actually received, ensuring that you pay only what you are required to pay.

By using our services you are maximizing the probability that you will never again have to appeal your property assessment, thereby avoiding expenses associated with that process.

Take charge of your next assessment. Know in advance if you are liable for an increase and why.

Financial statements are prepared for income tax purposes and do not reflect real estate value for assessment purposes. For this reason, many accountants refer their clients to us.
